2. FURTHER ACTION

If a demand for international preliminary examination is made, this opinion will usually be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA"). 2. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:
 - a. type of material:
 - ☐ a sequence listing
 - ☐ table(s) related to the sequence listing
 - b. format of material:
 - ☐ in written format
 - ☐ in computer readable form
 - c. time of filing/furnishing:

**WRITTEN OPINION OF THE

Re Item V.

1. Reference is made to the following document:

D1: WO 01/32653 A (CEPHALON, INC) 10 May 2001 (2001-05-10)

D2: JP 2000 016984 A2 (PFIZER INC., USA) 18 January 2000 (2000-01-18)

2. **Novelty**

The compound disclosed in preparation 48 on page 173 of the translated Japanese document D2 falls within the definition of formula (I) as claimed in the current application. Novelty is not acknowledged re D2.

3. **inventive step**

The problem underlying the present application appears to reside in the provision of pyrazole derivatives as protein kinase A and protein kinase B modulators and thus useful in treating abnormal cell growth in a mammal.

Since the structurally closest compounds, which are disclosed in D2 have a different activity, namely delta opioid antagonist activity, and the protein kinase modulators disclosed in D1 are remote in structure compared to the compounds of the present application, inventive step is acknowledged.

4. Further observations:

- Claims 69 to 74 are directed to a method for treatment of the human body by therapy.
- The "linker" group A needs a clearer definition in the claims.
- The possibility of substitutions on the rings (see e.g. E , R1) should be specified in the claims by introducing a list of suitable substituents
